

FBMobile for FASTbook

VIEW ANYWHERE

View your FASTbook calendar from anywhere you can use your internet-enabled mobile device.

REAL-TIME DATA

Remotely view your live scheduling information from wherever you might be. No need to sync or copy.

BOOK ON THE GO

Request space virtually anywhere. Book while at a client's, at a meeting, out of town, or wherever else you may roam.

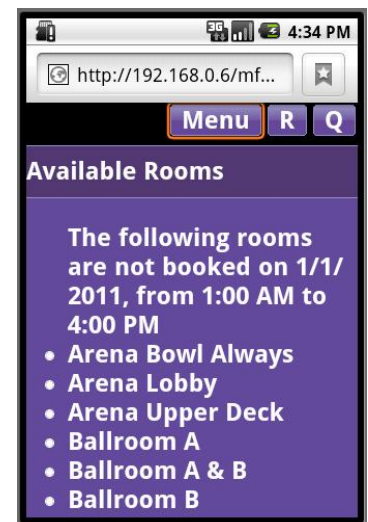

- Query for available room space by date and time
- Useable on virtually all mobile browsing devices
- Drill Down and look at detailed event information
- Search by date or by event name

FASTbook is now mobile! With FBMobile, you can book your events anywhere, anytime. FBMobile works on virtually any web-enabled phone, tablet, or other device with a web browser. Look up your events calendar and book directly from your phone. Search by event name or by specific dates. View event information including Event Name, Number, Room Names, Start Times and Show Times. Pull up Room Availability lists to find the perfect time and place for your event. Book events or see your calendar from the convention hall, the arena floor, main stage or your client's office!

No longer being confined by your facility's office space, booking and checking schedules out of the office increases productivity to a new degree. Have the freedom of moving about, while never being more than a fingertip away from all your valuable information.

FBMobile is configurable to only show what you need it to show you. Filter the calendar by room, status or event type. Show only events you care to see while on the road.

TECHNICAL SUPPORT

One year support and updates included with purchase.

Renewable for the evolution of the product. Enjoy new features and capabilities as our user influenced development cycle continues.

SITE LICENSE

FBMobile covers all users at your facility. Once you've installed the software, use it on as many web enabled devices as you need.

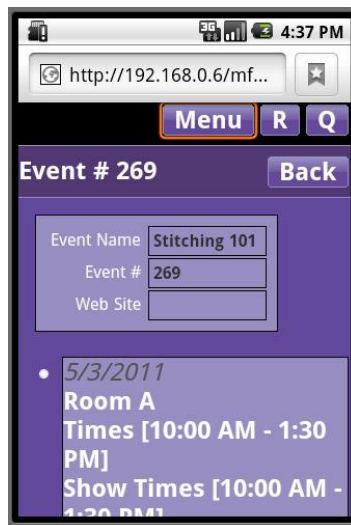

EVENT SOFTWARE

For over 27 years, our state-of-the-art facility and event management software has been helping facilities schedule events and manage the work in their organizations.

Features and Benefits

FBMobile is optimized for mobile devices and designed using cascading style sheets. This means you can configure the look and feel any way you desire. The included style sheet should work well on most smartphones and tablets.

Virtually any modern device that uses a web browser can accommodate FBMobile. Android, iPhone/iPad, Blackberry, as well as many other tablets and portable devices. If you can view web pages on it, you can probably use FBMobile on it as well.

System Requirements

- FASTbook 5.5
- Web enabled device (smartphone, tablet. etc)
- Wi-Fi or Internet access (depending on installation)
- Web Server running IIS versions 5, 6 or 7.x (running on a system that meets or exceed Microsoft's minimum requirements for the IIS installation)
- 1gb disk space
